RISKS AND UNCERTAINTIES

Credit Risk

The Company's credit risk is primarily attributable to cash. The maximum exposure of credit risk is best represented by the carrying amount of the financial instruments. The Company considers credit risk negligible as cash is held in reputable financial institutions.

Liquidity Risk

The Company monitors the expected settlement of financial assets and liabilities on an ongoing basis. At September 30, 2020, the carrying value and fair value amounts of the Company's financial instruments are approximately equal.

Market risk is the risk of loss that may arise from changes in market factors such as interest rates. The Company has no interest-bearing assets and only fixed interest debts and considers the market risk negligible.

Going Concern

To date, the Company has not achieved a sustainable stream of revenue. There can be no assurance that significant additional losses will not occur in the near future, or that the Company will be profitable in the future. In particular, the Company's operating expenses and capital expenditures are likely to increase significantly.

The Company expects to continue to incur losses until such time a sustainable revenue source can be developed. There can be no assurance that the Company will generate any revenues or achieve profitability.

Additional Financing
